The address of its registered office and principal place of business are disclosed in the introduction of the annual report.

**B SIGNIFICANT ACCOUNTING POLICIES**

**B.1 BASIS OF PREPARATION AND PRESENTATION**

The separate financial Statements have been prepared to comply in all material aspects with the Accounting Standards notified under Section 133 of Companies Act, 2013 as per Companies (Indian Accounting Standards (Ind AS)) Rules, 2015 and other relevant provisions of the Companies Act, 2013 and rules framed thereunder. Till the year ended 31st March 2019 the financial statement of the company have been prepared as Companies (Accounting Standards) Rules, 2006 as amended and other relevant provisions of the Companies Act, 2013 and rules framed thereunder.

The Financial Statements have been prepared under the historical cost convention and on accrual basis, except for certain financial assets and liabilities (including derivative instruments) measured at fair value; assets held for sale – measured at fair value less cost to sell and defined benefit plan assets measured at fair value.

**B.2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES**

**(a) Property, plant and equipment :**

Property, plant and equipment is stated at cost, net of accumulated depreciation. Such cost includes purchase price, taxes and duties.

Depreciation on fixed asset is provided to the extent of depreciable assets as prescribed in Schedule II to the Companies Act, 2013. the Residual Value of the Asset is less than 5% of the original cost hence depreciation is not provided and kept at remaining Value

The residual values, useful lives and methods of depreciation of property, plant and equipment are reviewed at each financial year end and adjusted prospectively, if appropriate.

Tangible assets carrying value under previous GAAP is recognized as deemed cost.

**(b) Impairment of non-financial assets**

The carrying amounts of assets are reviewed at each balance sheet date if there is any indication of impairment based on internal/external factors. An asset is treated as impaired when the carrying amount exceeds its recoverable value. The recoverable amount is the greater of the asset's net selling price and value in use. In assessing value in use, the estimated future cash flows are discounted to the present value using a pre-tax discount rate that reflects current market assessment of the time value of money and risks specific to the assets. An impairment loss is charged to the Statement of Profit and Loss in the year in which an asset is identified as impaired. After impairment, depreciation is provided on the revised carrying amount of the asset over its remaining useful life. The impairment loss recognized in prior accounting periods is reversed if there has been a change in the estimate of recoverable amount.

**(c) Investments and financial assets**

**Classification**

The company classifies its financial assets in the following measurement categories:

- those to be measured subsequently at fair value (either through other comprehensive income, or through profit or loss), and
- those measured at amortized cost.

The classification depends on the entity's business model for managing the financial assets and the contractual terms of the cash flows.

For assets measured at fair value, gains and losses will either be recorded in profit or loss or other comprehensive income. For investments in debt instruments, this will depend on the business model in which the investment is held. For investments in equity instruments, this will depend on whether the company has made an irrevocable election at the time of initial recognition to account for the equity investment at fair value through other comprehensive income.

## Measurement

At initial recognition, the company measures a financial asset at its fair value, in the case of a financial asset not at fair value through profit or loss, transaction costs that are directly attributable to the acquisition of the financial asset. Transaction costs of financial assets carried at fair value through profit or loss are expensed in profit or loss.

## Measurement of Financial Asset

• **Fair value through other comprehensive income (FVOCI):** Assets that are held for collection of contractual cash flows and for selling the financial assets, where the assets' cash flows represent solely payments of principal and interest, are measured at fair value through other comprehensive income (FVOCI). Movements in the carrying amount are taken through OCI.

• **Fair value through profit or loss:** Assets that do not meet the criteria for amortized cost or FVOCI are measured at fair value through profit or loss.

### (d) Investment Property

Investment Property is stated at cost of acquisition, such cost includes purchase price, taxes and duties and is treated as fair value as per Ind AS 40. No Depreciation is claimed on Investment Property.

### (e) Revenue recognition

Rent income are recognized on an accrual basis in accordance with the terms of relevant agreement. Dividend is recognized when the Company's right to receive the payment has been established.

### (f) Earnings per share

Basic earnings per share is calculated by dividing the net profit or loss for the year attributable to equity shareholders by the weighted average number of equity shares outstanding during the year. For the purpose of calculating diluted earning per share, the net profit or loss for the year attributable to equity shareholders and weighted average number of shares outstanding during the year are adjusted for the effects of all dilutive potential equity shares.

### (g) Cash and cash equivalents

For the purpose of presentation in the statement of cash flows, cash and cash equivalents includes cash on hand, deposits held at call with financial institutions and banks.

### (h) Current and non-current classification:

The Company presents assets and liabilities in statement of financial position based on current/non-current classification. The Company has presented non-current assets and current assets before equity, non-current liabilities and current liabilities in accordance with Schedule III, Division II of Companies Act, 2013 notified by MCA.

**An asset is classified as current when it is:**

- a) Expected to be realized or intended to be used in normal operating cycle,
- b) Held primarily for the purpose of trading,
- c) Expected to be realized within twelve months after the reporting period, or
- d) Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current.

**A liability is classified as current when it is:**

- a) Expected to be settled in normal operating cycle,
- b) Held primarily for the purpose of trading,
- c) Due to be settled within twelve months after the reporting period, or
- d) There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period.

All other liabilities are classified as non-current.

The operating cycle is the time between the acquisition of assets for processing and their realization in cash or cash equivalents. Deferred tax assets and liabilities are classified as non-current assets and liabilities. The Company has identified twelve months as its normal operating cycle.

(i). **Significant Accounting Judgments, Estimates And Assumptions:**

The preparation of the financial statements requires management to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the accompanying disclosures, and the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods. The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below. The Company based on its assumptions and estimates on parameters available when the financial statements were prepared. However, existing circumstances and assumptions about future developments may change due to market changes or circumstances arising that are beyond the control of the Company. Such changes are reflected in the assumptions when they occur.

**i) Property, plant and equipment, Investment Properties and Intangible Assets:**

Management reviews the estimated useful lives and residual values of the assets annually in order to determine the amount of depreciation to be recorded during any reporting period. The useful lives and residual values as per schedule II of the Companies Act, 2013 or are based on the Company's historical experience with similar assets and taking into account anticipated technological changes, whichever is more appropriate.

**ii) Income Tax:**

The Company reviews at each balance sheet date the carrying amount of deferred tax assets. The factors used in estimates may differ from actual outcome which could lead to an adjustment to the amounts reported in the standalone financial statements.

**iii) Contingencies:**

Management has estimated the possible outflow of resources at the end of each annual reporting financial year, if any, in respect of contingencies/claim/litigations against the Company as it is not possible to predict the outcome of pending matters with accuracy.

**iv) Impairment of financial assets:**

The impairment provisions for financial assets are based on assumptions about risk of default and expected cash loss. The Company uses judgment in making these assumptions and selecting the inputs to the impairment calculation, based on Company's past history, existing market conditions as well as forward looking estimates at the end of each reporting period.

**v) Recoverability of trade receivable:**

Judgments are required in assessing the recoverability of overdue trade receivables and determining whether a provision against those receivables is required. Factors considered include the credit rating of the counterparty, the amount and timing of anticipated future payments and any possible actions that can be taken to mitigate the risk of non-payment.

**vi) Provisions:**

Provisions and liabilities are recognized in the period when it becomes probable that there will be a future outflow of funds resulting from past operations or events and the amount of cash outflow can be reliably estimated. The timing of recognition and quantification of the liability require the application of judgment to existing facts and circumstances, which can be subject to change. Since the cash outflows can take place many years in the future, the carrying amounts of provisions and liabilities are reviewed regularly and adjusted to take account of changing facts and circumstances.
